

Asset Management Services

Use your assets effectively to achieve corporate goals and objectives

Supporta TerraQuest can help you to:

- Generate capital receipts;
- Reduce operating costs;
- Enhance performance through a property portfolio matched to service requirements;
- Identify opportunities for partnership working and shared service delivery with Local Authority partners;
- Respond to the Comprehensive Area Assessment requirement for a strategic approach to asset management.

Supporta TerraQuest offer a suite of activities to improve asset management.

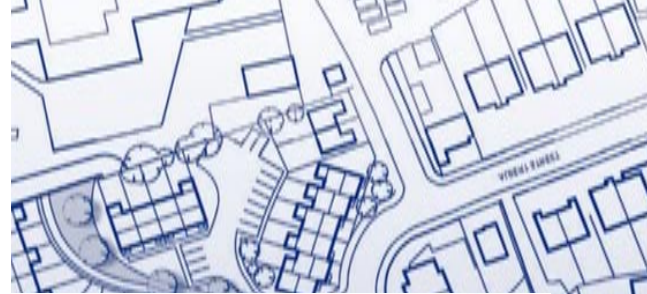

This includes options such as:

- Preparation of an Asset Management Action Plan;
- Securing 'buy-in' to improved asset management;
- Assembly of a corporate view of the live asset base and future requirements;
- Review of the asset management strategy;
- Development of high-level Asset Management Plans encompassing:
 - *Property rationalisation;*
 - *Business improvement programmes.*
- Provision of land and property asset management information through innovative web-enabled Property Information Services;
- Service management support to oversee the delivery of the Asset Management Strategy.

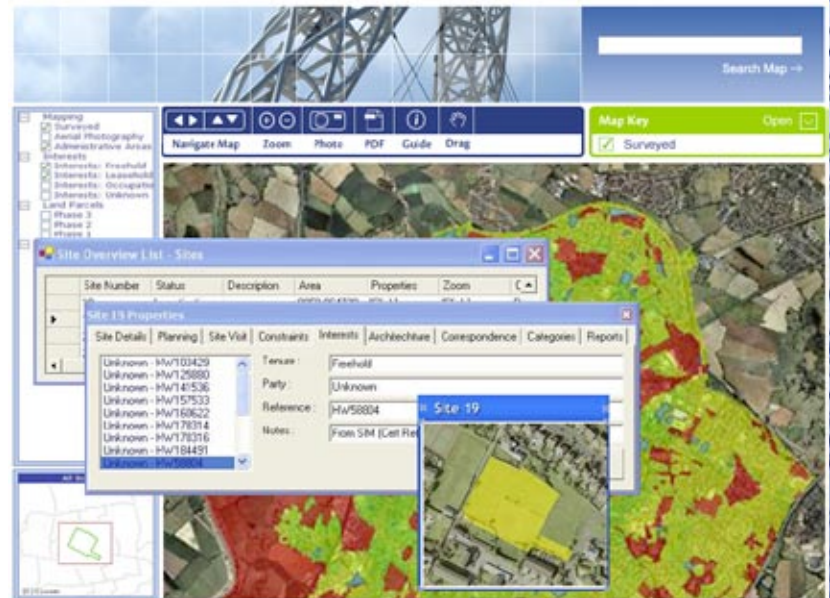

We will deliver:

- An Asset Management Plan which will meet the Local Authority's business aims and objectives;
- A rationalised asset base resulting in;
 - Improved service delivery capability;
 - Reduced operating costs;
 - Release of capital.
- Improved business processes to provide a more efficient and effective service;
- Comprehensive and accurate asset records and the ability to maintain them.

Case study

Department for Transport

DfT is pursuing the objectives laid down in the Government's High Performing Property Agenda. In order to do this DfT with the assistance of Supporta TerraQuest is putting in place a property Asset Management Plan covering the entire departmental estate.

This encompasses a wide range of office, operational and miscellaneous properties, including the entire Highways Agency estate and the residual British Railways estate.
