

Supporta Professional Services

Systems

With over 30 years experience in delivering IT solutions to the NHS Supporta Professional Services, Systems is a natural partner for any organisation looking to implement, improve or consolidate its healthcare IT.

Our offerings cover the key areas that impact the efficiency and reliability of your Patient Administration Systems.

Data Migration

With the advent of the governments National Programme for Information Technology (NPfIT), we now use our extensive experience for data migration contracts. Our profound understanding of the nuances of NHS IT means we ease the transition to new NPfIT systems and make the digitisation of paper records a predictable, reliable and straightforward process. We understand subtleties that are lost on more generalist IT agencies.

Information Management and Technological Consulting

Supporta Systems I,M and T group allows any NHS organisation access to an unparalleled wealth of experience that can add value to almost any area of IT. We have unrivalled IM&T expertise – having successfully carried out several hundred assignments for some 100 different NHS clients!

Strategy Development is a particular strength and helps you plan for and into the future and apart from IM&T also excel in infrastructure and organisational arrangements.

Supporta also specialise in Investment Appraisal, Procurement planning and management and Implementation & Operation (even on systems not our own).

Project Management on Prince2 enables us to supply key team members, prepare initiation documents with other specialist services including: business process reviews and re-design, information security to BS7799 and ISO17799, and health records management solutions – in tandem with our other

group company

Document Solutions who are market leaders in critical data capture and highly regulated document conversion.

Development, Maintenance and Medical Information Management

Our Medical Information Management department can cover all your medical record outsourcing needs using some of the most robust and dependable systems currently available. We are able to deliver digitised records over N3 securely and totally in keeping with the Data Protection Act and all its sensitivities.

Our roots as an internal NHS IT department mean our business has been built on the provision of bespoke IT systems to hospitals and now Trusts.

We have designed implemented and supported systems in almost every area of Healthcare IT from Pathology, through the national Breast Screening System and on to PAS's for individual hospitals.

Our consultants benefit from an average of over 24 years experience in NHS IT meaning that we may be the only organisation able to assist some clients.

Supporta Healthcare Systems understand the challenges client's face at a level that generally endears our consultants to their staff resulting in strong working relationships and partnerships that are difficult to strike up with generalist IT professionals who have not made the NHS their sole business.

Supporta Systems; credibility and experience in NHS IT.
